

PERMASTEELISA

To Whom it may concern

VE Group (Eurofasad) has worked for our company as a subcontractor on the SOCAR Tower Project.

VE Group was responsible for supply and installation of approximately 350 sets of steel and fire doors.

We found VE Group, competitive, experienced, knowledgeable and very cooperative during the project.

They have provided adequate man-power, management, and expertise necessary to complete this high spec project on time on budget and with quality workmanship.

We would recommend this company to someone wishing to complete their project in a most efficient, competitively priced and professional manner.
